

Document Workflow Platform

Streamline Inbound Document Management

A background image showing a stack of papers, with the left side being dark blue and the right side showing the edges of many white pages.

Work Smarter.
Work Faster.

Transform Manual Processes into Smarter Workflows

The Document Workflow Platform transforms paper-based processes into coordinated digital workflows that keep essential documents moving and provides quick, accurate access to critical information.

The platform incorporates proven Forward Advantage RapidFiler technology, enhanced and reimaged for the cloud, to power the first available workflow: streamlined document filing to the MEDTIECH patient chart.

As a cloud-native solution, the Document Workflow Platform delivers the flexibility, scalability, and speed modern healthcare organizations need.

But that's just the beginning. Find out how Document Workflow can transform workflows for clinics, hospital departments, IT staff, and clinical staff.

Move to the Cloud. Lighten Your Team's Workload.

The cloud-native platform reduces the burden of IT administration for updates, overall administration, and user support.

Hosted by Forward Advantage, the platform quickly flexes to your needs, while time to manage infrastructure is reduced.

Move Beyond Scanning and Uploading

Give your team options to edit, annotate, store and work documents all in one central location.

MEDITECH Integration

Integration with MEDITECH provides access to important information to ensure accurate filing into the patient chart & notifications via Workload messages.

Faster Document Processing

Process and file documents quickly with built-in editing options to split, delete, add, rotate, combine, and annotate.

Centralized Cloud Storage

Storage and queueing for all documents, including standing orders, incomplete orders, and more.

Replace Paper Fax Workflows

No need to print and scan faxes to the patient chart.
